

Professor Mark Easton is currently the Associate DVC (Research Infrastructure) at RMIT University where he has been since 2014 in roles including the Director of the Advanced Manufacturing Precinct and Associate Dean (Manufacturing, Materials & Mechatronics). Prior to this he was at Monash University where he primarily worked with the CAST Co-operative Research Centre and was its final CEO. Mark's PhD is from the University of Queensland and he has also worked at Comalco (now Rio Tinto Aluminum) Research Centre and at the Leichtmetallkompetenz Zentrum, Roshofen (LKR) in Austria. He is the winner of a number of awards including the Henry Marion Howe Award, the GKSS Magnesium Award and most recently a Mercator Fellowship. Whilst at the CAST CRC he received five commercialization awards for his role in the commercialization of technologies. He has over 25 years experience in solidification processing of light alloys, initially focusing on casting but has more recently focused on additive manufacturing.
